

Author Last Name	Institution	City, State, Country	Title	Session	Poster Number
Azhar 1	University of Arizona	Tuscan, AZ	Postnatal function of transforming growth factor beta2 in cardiovascular disease	2	33
Azhar 2	University of Arizona	Tuscan, AZ	Role of transforming growth factor - beta3 in arrhythmogenic right ventricular cardiomyopathy/dysplasia type 1 (AVRD1)	2	34
Baudhuin	Mayo Clinic	Rochester, MN	An ACTA2 Genetic Variant in a Family Presenting with a Thoracic Aortic Dissection and a Carotid Aneurysm	2	27
Bernhardt - 2	University Heart Center Hamburg	Hamburg, Germany	Mitral Valve Surgery in Patients with Marfan Syndrome	1	12
Bernhardt -1	University Heart Center Hamburg	Hamburg, Germany	Longterm Results after Aortic Root Replacement in Patients with Marfan Syndrome	1	11
Bischoff	Mount Sinai	NY, NY	Minimizing Paraplegia in Patients With Marfan Syndrome Undergoing Descending and Thoracoabdominal Aortic Aneurysm Repair	1	13
Burchett	University of Kentucky College of Medicine	Lexington, KY	Tissue and Developmental-Specific Variability in FBN1 Isoform Expression	2	42
Carta	Mount Sinai	NY, NY	Characterization and Treatment of Osteopenia in Mice with Severe Marfan Syndrome	2	35
Charbonneau	Oregon Health & Science University	Oregon, WA	In vivo deletion of the first hybrid domain in fibrillin-1	2	36
Child - 1	University of London	London, UK	Gene Test Priority in Marfan Syndrome Screening Clinic	1	1
Child - 2	University of London	London, UK	Role of ADAMTSL4 Mutations in FBN1 Mutation Negative Ectopia Lentis Patients	2	28
Collod-Beroud	Inserm U827	Warrenton, VA	Marfan syndrome and Associated Disorders (MSAD) Databases: 15 Years of Experience	1	2
Cook	Mount Sinai	NY, NY	Conditional Inactivation of Fibrillin-1 in Aortic Tissue Compartments	2	37

Author Last Name	Institution	City, State, Country	Title	Session	Poster Number
Detaint	Hospital Bichat	Paris, France	Evaluation of left ventricular function in 200 patients with Marfan syndrome using conventional Doppler-echocardiography, tissue Doppler and 2D strain imaging.	1	14
Do	Prince Charles Hospital	Brisbane, Australia	Marfan syndrome and Bicuspid Aortic Valve Aneurysm Ultrastructure Abnormalities	2	47
Faivre - 1	Hopital d'Enfants	Dijon, France	Towards the Dissection of Marfanoid Syndromes with Mental Retardation	1	3
Faivre -2	Hopital d'Enfants	Dijon, France	Prenatal and Preimplantation Diagnoses in Marfan Syndrome: The Point of View of French Patients and Geneticists	2	49
Forteza - 1	Hospital Universitario	Spain	Proteinuria and Microalbuminuria as Predictors of Renal Dysfunction in a Cohort of Forty Eight Marfan Syndrome Patients	1	15
Forteza - 2	Hospital Universitario	Spain	Aortic Valve-Sparing in Marfan Syndrome: Midterm Results with David Operation (Stanford Modification)	1	16
Frاند	UCLA	Los Angeles, CA	Dynamic Regulation of the Fibrillin-Like FBN1 Protein	2	38
Hanna	Hopital Amroise Pare	Boulogne, France	Isolated Ectopia Lentis: Report of a New Deletion In the AdamsL4 Gene and Evidence for Genetic Heterogeneity of the Autosomal Recessive Form of the Disease	2	29
Henggeler	University of Zurich	Schwerzenbach, Switzerland	FBN1, TGFBR1, TGFBR2, and SLC2A10 Mutation Analyses in Patients with Suspected Marfan Syndrome: A Swiss Study	1	50
Hilhorst-Hofstee	Leiden University Medical	Leiden, the Netherlands	The Clinical Spectrum of Complete FBN1 Allele Deletions	1	4
Kan	University of Tokyo	Tokyo, Japan	Midterm Results of Valve-Sparing Aortic Root Replacment for Annulo-Aortic Ectasia	1	17

Author Last Name	Institution	City, State, Country	Title	Session	Poster Number
Magyar	University of Zurich	Schwerzenbach, Switzerland	Quantitative Sequence Analysis of FBN1 Premature Termination Codons Provides Evidence for Incomplete NMD In Leukocytes	1	5
Manalo	Oregon Health & Science U	Oregon, WA	Aortic Disease in a New Mouse Model of Marfan Syndrome	2	39
Masahiro	Tokyo University	Tokyo, Japan	ADAMTSL6beta rescues microfibril disorder in Marfan syndrome through the promotion of fibrillin-1 assembly	2	40
McLoughlin	Royal College of Surgeons	Dublin, Ireland	Comparison of Pravastatin, Losartan and Doxycycline for Attenuation of Aortic Root Dilatation in a Murine Model of Marfan Syndrome.	2	48
Meienberg	University of Zurich	Schwerzenbach, Switzerland	Hemizygous Deletion Comprising COL3A1 and COL5A2 Causes Aortic Dissection	2	30
Mesfin	Johns Hopkins	Baltimore, MD	The Natural History of Dural Ectasia in Marfan Syndrome	1	10
